

Targeting Gold and Silver in Northern Chile

Our objective is to discover and develop world-class precious metals deposits in the northern areas of Chile. Our flagship project, Pampa Paciencia, is located 175 km (108 miles) north of the El Peñón mine in Northern Chile and is a recent epithermal discovery that produced significant gold and silver grades from limited trenching and drilling. Like El Peñón, Pampa Paciencia is in the same geological belt, is the same approximate age, hosts the same style of mineralization and shows potential to host a robust epithermal precious metals vein system.

Astra Investment Highlights

- 1. Exceptional team credited with multiple epithermal discoveries in Chile and the Americas**
- 2. Pampa Paciencia is a very large, underexplored epithermal system with high-grade gold and silver drill intercepts**
- 3. Chile is vastly underexplored for precious metals and presents excellent opportunity for discovery**
- 4. Chile's favorable climate enables year-round exploration – more value creation in less time**
- 5. Newly formed company provides investors the opportunity to invest in a growth company with an impressive heritage**
- 6. Building a portfolio of high-quality projects**

About Chile

Often the answer to Jeopardy! questions because of its unique geography, the Republic of Chile truly is a fascinating nation. From its history of the Mapuche indigenous people, to one of the longest continuous mountain ranges on the globe and its rich mining history, Chile is a land of contrasts.

Its coastline stretches 4,300 km (2670 miles), nearly the width of the entire continent and is only 216 km (134 miles) at its widest point. The nation is rife with lithium, but copper mining makes up 20% of Chilean GDP. Coal, oil and gas account for much of its total primary energy.

Chile is politically and socially stable with a high-income economy and is considered one of the most prosperous nations in South America. It has a thriving transportation network and strong tourism economy.

Forward Looking Statement

This document contains “forward looking statements” regarding the Company within the meaning of applicable securities legislation, including statements as to future events, results and plans. Such forward-looking statements reflect the Company’s current beliefs and are based on information currently available to the Company and assumptions the Company believes are reasonable. Actual results and developments may differ materially from results and developments discussed in the forward-looking statements as they are subject to a number of significant risks and uncertainties, some of which are beyond the Company’s control. Consequently, all of the forward looking statements are qualified by these cautionary statements, and there can be no assurances that the actual results or developments will be realized or, even if substantially realized, that they will have the expected consequences or benefits to, or effect on, the Company.
