

Continuing a Legacy of Gold & Silver Discovery

- **Q4 2026: 10,000-20,000m drill program at La Manchuria + inaugural drill program at Don Mario**
- Bulk-tonnage gold-silver resource open in all directions + prospective high-grade feeder zones
- Portfolio of high-grade gold & silver epithermal (+copper) projects in Argentina and Chile

CATALYST:

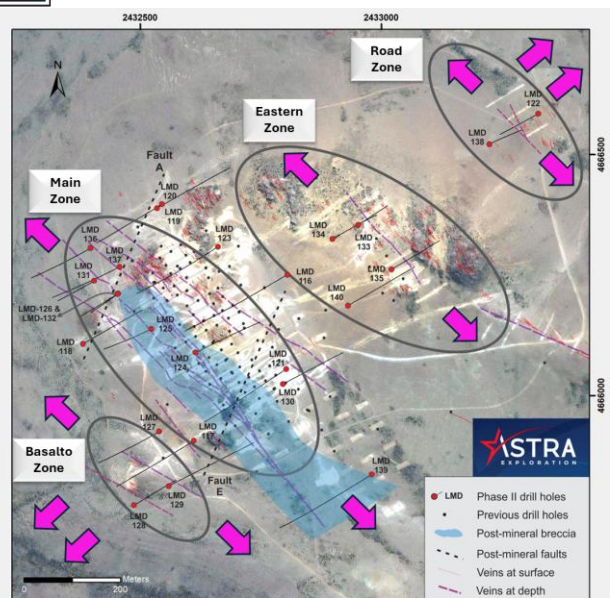

Drilling at La Manchuria

- Bonanza-grade gold & silver
- Clear drill targets near surface
- Open system in all directions
- Unexplored regional targets
- Available mining infrastructure

Best drill results include:

- 6.3m @ 3.3 g/t Au + 837 g/t Ag
- 3.1m at 9.0 g/t Au + 1,286 g/t Ag
- 4.4m at 11.8 g/t Au + 2,781 g/t Ag
- 1.6m at 75.1 g/t Au + 228 g/t Ag
- 20.5m at 10.4 g/t Au + 810 g/t Ag
- 1.6m at 257 g/t Au + 4,237 g/t Ag
- 4.0m at 26.3 g/t Au + 3,156 g/t Ag
- 2.0m at 52.6 g/t Au + 3,274 g/t Ag

Intervals in magenta are from Astra's drilling to-date. Results in black are historical intercepts. Purple arrows (right) show expansion opportunity.

High-Grade Gold & Silver in Argentina and Chile

TSX.V: ASTR | OTCQX: ATEPF | FSE: S3I

Project Portfolio with Deep Value:

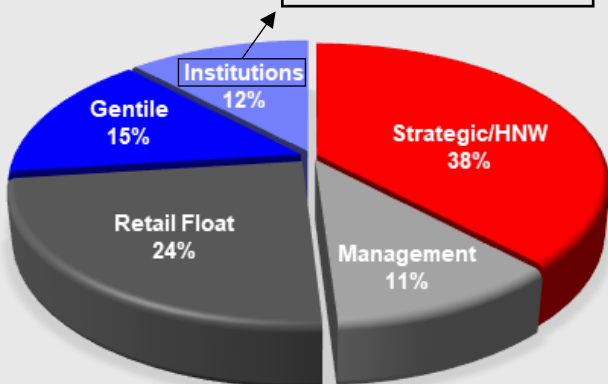

- **La Manchuria: 5,600 ha.** FLAGSHIP PROJECT At-surface bonanza-grade epithermal gold-silver system in the Deseado Massif. Expanding bulk-tonnage resource open in all directions. Developing high-grade “feeder zones” at 200-300m vertical depth. **Funded for drilling**
- **Don Mario: 4,480 ha.** HSE gold +/- porphyry system in the Maricunga Belt with high-grade gold in surface samples. Similarities to Gold Fields' Salares Norte mine (~20Mt @ 4.9g/t Au + 67g/t Ag)¹ ~150km to the north. **Funded for drilling**
- **Pampa Paciencia: 3,840 ha.** Large, concealed gold epithermal system with thick (10-15m) veins and 3 near-surface ore shoots + Cu porphyry target. Adjacent to Sierra Gorda & Spence copper mines.
